

Wireless  
Xmitter

Using 4-port HD switcher

Advantage:

small, less expensive, can stream directly from it, has titling, cuts, etc.

Disadvantage:

use of HDMI cabling limited to ~26 ft.

Limited outputs

Computer handling required

Here we use direct output from computer to output. Program output is only available on stream.

Note that cameras may record their own copy for post-production. Mic feeds into camera OR some other sync-audio required.

Questions: should we put a Cloner box in the loop for presentation backup?

Main Equipment  
ATEM Studio Mini  
Audio Mixer?

Rough Cost: \$300  
recording with computer

Need 7 ft of cable from bench  
To projector input.
