## Components and Connections

Basic setup using wired-video and possible wireless audio.

Every camera will require supports available, either tripod or clamps with safety wire.

Green components would be within reach of presenter (or technical director.)

## Basic List

Computer with webcam or alternate cam  
optional LCD screen for in-room view  
camera/tripod for medium-wide shot of presenter  
camera/tripod or clamp/arm for project closeups  
active HDMI switcher console

Cables:

HDMI-HDMI (3) (or 4 if optional screen)

Cat 5 for control and switch

lighting: lights, stands, and necessary power cords

charged batteries for all cameras OR external power adapters.
