Components and Connections

1.1 update - use an active switcher for video and audio routing TO the Zoom-host computer.

Basic setup using wired-video and wireless audio.

Every camera will require support available, either tripod or clamps with safety wire.

Green components would be within reach of presenter (or technical director.)

Basic List

Computer with webcam or alternate cam
optional LCD screen for in-room view
camera/tripod for medium-wide shot of presenter
camera/tripod or clamp/arm for project closeups
active HDMI switcher console

Cables:
HDMI-HDMI (3) (or 4 if optional screen)
Cat 5 for control and switch

lighting: lights, stands, and necessary power cords

charged batteries for all cameras OR external power adapters.
